July 22, 2015

Beverly Banister, Director
Air Pesticides & Toxics Management Division
US EPA - Region 4
61 Forsyth Street, SW
Atlanta, GA 30303

Dear Ms. Banister:

In accordance with 40 CFR 58.10, ADEM, the Jefferson County Department of Health (JCDH), and the Huntsville Division of Natural Resources and Environmental Management (HDNREM) have prepared a consolidated Annual Network Plan for the State of Alabama. The plan was placed on the ADEM website on June 2, 2015, to start a 30 day public review period. The review period concluded at the close of business on July 2, 2015. However, a request was made by the Southern Environmental Law Center (SELC) to extend the review period. ADEM agreed to allow SELC until close of business July 16 to submit comments.

During the original 30 day public review period, ADEM received comments from 2 organizations. JCDH commented on an editorial error which was corrected. This correction did not affect the number of monitors required or result in a change to the network. Comments were also received from GASP. No changes were made to the plan based on their comments. The SELC submitted comments during the extended review period. Minor editorial revisions were made to the plan based on these comments which did not result in a change to the network.

Sincerely,

Mike Malaier, Chief
Air Assessment Unit
Field Operations Division

MM
